

"On behalf of NordicImagingLab it is a great pleasure for me to invite you to the Advanced Neuroimaging Workshop in Tokyo, at the Royal Norwegian Embassy.

Based on our personal interest in the field of MRI, we are always excited to learn about how MR Perfusion already is improving the quality of patient care and what possibilities the future brings.

By looking at the list of highly renowned speakers both from Europe and Japan that will present their work and give us more insight into the intriguing field of MR Perfusion, I am confident that the workshop will be a most interesting event and we do hope to see as many of you there. We also hope to have the possibility to present and discuss some of the solutions that NordicImagingLab and L.A. Systems are bringing to the Japanese market to make MR Perfusion and other advanced MRI techniques more accessible."
